Paired Samples t Test

Entering the Data

- 1. From the available tabs, select "Paired".
- 2. On the left side, you will be able to enter the data in the shaded cells.
- 3. Enter the data in the individual cells of the column for the variable. Note that each cell should contain a single score for an individual person. There will be as many rows as people.
- 4. Notice that each individual (i.e., the rows) has a value for each instance of the within-subjects variable (i.e., the columns).

Obtaining Descriptive and Inferential Statistics

- 5. Output will automatically appear on the right side of the tab.
- 6. If you wish to alter the confidence intervals for the means, enter the preferred confidence level in the shaded cell after "CI %".
