One Sample Data

In the steps below, the commands should be typed directly into the R console window.

Entering Data

Enter the data in a vector that assigns a variable name.

```
Outcome <- c(0, 0, 3, 5, 4, 7, 4, 9)
```

Viewing Data

Create and display a data frame to view the data set.

```
OneSampleData <- data.frame(Outcome)
OneSampleData
```
